

PERMIT ROADS TO MOVE LIQUOR

Transportation Under Dean Prohibition Law Granted by Controller's Dept.

Austin, Texas, Nov. 15.—A blanket permit was granted today by the controller's department in the Texas railroad under federal control to transport liquor under the provisions of the Dean prohibition law on the application of Walker D. Hines, director general of railroads.

The action was taken by the controller after the form of the permit had been prepared and approved by the attorney general's department. This settled a proposition which has been quite embarrassing to the controller's department as well as an impediment to many persons having liquor awaiting shipment for lawful purposes.

The delay in granting the permit has caused a threat from the attorney general that mandamus proceedings would be instituted to require the railroad to obtain a permit.

48 Year Old Letter Returned To Sender

Baltimore, Md., Nov. 15.—A letter written 48 years ago by the treasurer of the Baltimore & Ohio railroad to a New Yorker has been returned to its sender marked "Returned." The letter to which it was sent had been about for many years.

ASPIRIN FOR HEADACHE

Name "Bayer" is on Genuine Aspirin—say Bayer

Insert in "Bayer Tablets of Aspirin" is a "Bayer" seal, containing proper directions for Headache, Cold, Pain, Rheumatism, Gout, and Rheumatism. Name "Bayer" means genuine Aspirin, prescribed by physicians for thirteen years. Handy tin boxes of 12 tablets, cost a few cents. Aspirin is a trademark of Bayer Manufacturing Co., Monroeville, Pa.

Of Utmost Importance
Pure, emulsified cod-liver oil is not medicine as many are prone to think of medicine.

SCOTT'S EMULSION

is a form of growth-nourishment that is of utmost importance to many children. That most children relish and thrive on Scott's is a "truism" accepted the world over. Give Scott's to the children and watch them grow strong!

QUICK RELIEF FROM CONSTIPATION

Get Dr. Edwards' Olive Tablets

This is the joyful cry of thousands since Dr. Edwards' Olive Tablets, the substitute for laxative pills, have been found to be so effective. Dr. Edwards' Olive Tablets are a soothing, healing, vegetable compound mixed with olive oil. If you have a bad taste, bad breath, feel dull, tired, are constipated or bilious, you'll find quick and sure relief from Dr. Edwards' Olive Tablets at bedtime, 10c and 25c a box.

FINE FOR RHEUMATISM

Musterole Loosens Up Those Stiff Joints—Drives Out Pain
You'll know why thousands use Musterole once you experience the glad relief it gives.

Get a jar at once from the nearest drug store. It is a clean, white ointment, made with the oil of mustard. Rubbing it on the sore spot and the heat of the mustard drives out the pain. Rubbing it on the sore spot and the heat of the mustard drives out the pain.

MUSTEROLE

WILL NOT BURN
HEISEL'S OINTMENT

Constipation, rheumatism, and other ailments are relieved by the use of Musterole. It is a clean, white ointment, made with the oil of mustard. Rubbing it on the sore spot and the heat of the mustard drives out the pain.

SURVEY GIVES PREDEPOSITS

Explains Resources of New Mexico and Estimates Amount Available.

Santa Fe, N. M., Nov. 15.—A report of much usefulness to those interested in the mineral resources of New Mexico has just been issued by the United States geological survey. Practically all the known deposits of manganese ore were investigated by the survey during the war period ending in 1918.

In addition to estimating the total amount of ore available, which was the main object of the work, the geologists learned more or less about the character, origin and other interesting features of the ore.

To make a useful record of all this information, descriptions of the manganese deposits in different areas are now being published by the survey.

In bulletin 719-B the deposits of manganese ore in New Mexico are described by E. L. Young, Jr. During the war New Mexico supplied considerable amounts of manganese and manganese ores for use in steel making. Prior to the war a large quantity was mined and shipped to different smelters for use as flux. The geological relations, types and mineralogy as well as the strictly economic features of 50 or 60 deposits are described in bulletin 719-B, a copy of which may be had free of application to the director, U. S. geological survey, Washington, D. C.

REPRESENTATIVES OF DOLORES MINES TO MAKE REPAIRS

Representatives in El Paso of the Dolores Mines company have been inspecting the Dolores mines of that county in the western part of the state of Chihuahua, a day's ride westward from the lumber town of Madera. The mines have been shut down for nearly five years, owing to revolutionary and bandit conditions.

At the local office it was said Monday that there is no certainty about starting operations at the mines, but that it was quite probable that some repairs to the mine and mine equipment would be made as a matter of economy in preserving equipment. The Dolores Mines is a British controlled concern and the Dolores mines are one of the great properties of Chihuahua. The company owns various mines in Mexico.

COMMISSION ORDERS PROBE INTO MINING CO. STOCK

Phoenix, Ariz., Nov. 15.—Inquiry has been ordered by the state corporation commission into the affairs of the Chino Mining Co., a corporation which has been selling stock on the basis of a silver mine at Chino, Mohave county, Arizona. The commission is investigating the sale of the stock, which is believed to be a violation of state law in violation of the provisions of the corporation laws of Arizona.

SILVER WORTH MORE AS METAL THAN IT IS AS COIN

New York, Nov. 15.—Silver now is worth nearly 5 cents an ounce more as metal than it is as coin. Silver for sale in London delivery was quoted Tuesday at \$15.4 an ounce as compared with \$1.38 as silver, which is the basis on which silver in coin is valued. Silver for local delivery was quoted at \$1.25 an ounce. Buying for Chinese account is believed to be responsible for the advance.

Berlin Freight Thieves Adopt Smoke Screen

Berlin, Germany, Nov. 15.—The smoke screen attack on freight cars is the latest adaptation by Berlin crooks of their war experience to the needs of the peacetime. The raiding party which operated in one of the largest freight yards in Berlin unloaded recently consisted of a willing engineer, a strong arm fireman and a locksmith. A brakeman shared in the loot.

A quiet sector in the yards was chosen for the assault. A car of foodstuffs was detached from a train and backed down a distant siding. Here the strong arm fireman got busy and his locomotive soon belched out so much smoke and steam that the locksmith could work unhindered. A few minutes later the car was returned, but attacked in the wrong train, finally being at once for another job.

By the time the freight car again found its way back to Berlin no one could prove where the theft had taken place.

Why Worry about SUGAR? Your Grocer has Lots of Karo

FOR cooking and baking Karo is used in millions of homes. In all cooking and baking recipes use mostly Karo instead of sugar. It is sweet, of delicate flavor and brings out the natural flavor of the food.

Nothing better than Karo for candy making. For successful preserving use Karo fifty-fifty with sugar or use straight Karo if preferred.

Buy In Quantities —Save Money

There are Three Kinds of Karo
"Crystal White"-in the Red Can, "Golden Brown"-in the Blue Can, "Maple Flavor" the new Karo with plenty of substance and a rich Maple Taste-in the Green Can.

Increase Poultry Profits By Feeding Fresh Garbage

High Costs of Poultry Production May be Markedly Reduced by the Judicious Use of Garbage in Feeding Laying Hens.

FRESH garbage, fed as soon as possible after it is discarded from the tables of consumers, provides an efficient feed for poultry. Used judiciously it will reduce the cost of egg and meat production from 15 to 20 per cent.

Chicken's feast on garbage, which is a good egg and meat producer.

undesirable materials from going into the garbage. Specialists of the United States department of agriculture recommend running the garbage through a meat or vegetable chopper and mixing it with a little moist mash before it is placed before the fowls. The amount which is fed will entirely depend on the size of the flock, it being usually advised to provide a mash refuse on the birds will clean up with a relish in the course of an hour. Any food which the fowls reject should be removed from the troughs, feeding pens, or yards as soon as possible thereafter. Other- wise it would soon become a pest and consequently, if the use of garbage is to be successful, the fowls must be kept clean and healthy.

liful egg yield results, while economical and rapid meat production is also augmented by the judicious use of garbage in the ration. Ordinarily it is advisable where garbage is plentiful to mix enough supplementary mash with the garbage to give the mixture a good consistency. In case the garbage contains much fruit and vegetable peelings it is essential to add more mash, while if the garbage is made up chiefly of potato peelings, bread, meat, and the like, no mash is necessary. Special precautions should be exercised to free the garbage from any water or excess liquid, this being commonly accomplished by dipping off and feeding the top of garbage and allowing the excess liquid to remain in the container.

Feeds Garbage Freshly.
One southern poultryman who handles about 1000 birds reports excellent results from the use of well selected garbage, which he obtains from a large charitable institution. He feeds the garbage twice a day, and feeds it to the birds about 10 o'clock in the morning, and again during the middle of the afternoon, so that the birds are fed fresh, only two or three hours after they are discarded from the kitchen. This poultryman feeds the garbage on the grass of the range, in such quantity that the fowls clean up all the refuse. The successful results obtained by this chicken farmer are due largely to the well selected and thoroughly fresh garbage which is fed. He reports a constant result from the feeding of garbage to fattening cockerels and old hens, but also in its use for laying hens and pullets. From a small number of turkeys which are maintained on this farm are always plentiful on the watch for the garbage wagon. The garbage which is fed is usually a mixture of vegetable scraps, grasshoppers and nutritious elements as readily as the chickens can get at it. In the morning the garbage is spread out on the ground.

HEAD STUFFED FROM CATARRH OR A COLD
Berg Cream Applied in Nostrils Opens Air Passages Right Up

Instant relief—no waiting. Your congested nostrils open right up; the air passages of your head clear and you can breathe freely. No more hacking, sneezing, blowing, head-ache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Doctor Tells How to Detect Harmful Effects of Tobacco

Try These SIMPLE TESTS

New York, Nov. 15.—Doctor Conrad, formerly of Johns Hopkins hospital, says many men who smoke, chew or sniff tobacco, and who are seemingly healthy are suffering from progressive organic ailments. Thousands of them would never have been afflicted had it not been for the use of tobacco. The chief danger to health from tobacco is nicotine, a deadly poison which, when absorbed by the system, attacks the nerves, impairs the digestive and vital organs of the body. The harmful effect of tobacco varies according to circumstances. One will be afflicted with general debility, others with catarrh of the throat, indigestion, constipation, extreme nervousness, sleeplessness, loss of memory, lack of power, mental confusion, etc. Others suffer from heart disease, bronchial trouble, hemorrhage of the arteries, tuberculosis, asthma or weak lungs or the common, affliction known as emphysema. If you use tobacco in any form you can easily detect the harmful effects by making the following simple tests. Read about them full page from a book. If, in the course of reading your voice becomes husky, hoarse and throaty, and you must frequently clear your throat, the chances are that your throat is affected by catarrh and it may be the beginning of more serious trouble. Next, in the morning before taking your usual smoke, walk up three flights of stairs at a regular pace, then stop. If you find that you are out of breath, your heart beat is rapid, or you feel dizzy, you may be a victim of functional or organic heart trouble. If you feel that you must smoke, chew or sniff tobacco to get your nerves, you are a slave to the tobacco habit, and are positively poisoning yourself with the deadly drug. Nicotine is either used by you in two alternative ways—keep up with the self-poisoning process, or give up the habit. You can overcome the craving and stop the habit in a very short time by using the following "rescue" formula. Go to any drug store and ask for Nicotinic Acid, or ask for "Nicotinic Acid" in a large bottle. Take one-half ounce of the acid, and add to it a comparatively small amount of water. You will have no desire for tobacco, the craving will have left you. With the nicotine poison out of your system your general health will quickly improve.

Poisoned Cookies Nearly Cause Death Of Waitress

Waynes, Okla., Nov. 15.—Frank Crowfoot, baker for the Harvey estate here, is in jail at Tulsa, and Florence Marshall, waitress at the same restaurant, is at the point of death as a result of three poisoned cookies which, it is alleged, had been "doped."

According to the police, says an intended the cookies to be used for poisoning Mrs. Harvey, who had been "doped."

Tan-No-More The Skin Beautifier

Protects the complexion in all seasons. Will remove all blemishes, freckles, and the skin from the effects of the sun. It is a skin cream and will keep the skin soft and smooth. It is a skin cream and will keep the skin soft and smooth. It is a skin cream and will keep the skin soft and smooth.
